

ASPHALT TAMPER

Potmix® Asphalt Tamper enables quick compression of asphalt material in road repairs. For optimal performance, all asphalt mixes should be compressed prior to use. A good compression reduces the risk of aggregate disintegration and minimises the risk of water ingress undermining the repaired area.

HANDLE: high quality PVC handle with maximal grip and minimal workload on the hands. The grip height is 30 cm.

SHAFT: steel shaft for great durability. The total tamper length is 112 cm and shaft diameter is 3.5 cm.

PLATE: 20x20 cm cast iron plate for flexibility even in confined spaces. Total tamper weight is 4.75 kg.
