

ASPHALT MASTIC

Potmix® Asphalt Mastic is used for durable and dense repairs of asphalt surfaces. This asphalt, in a patented granular form, is manufactured according to EU standard EN13108-6 for mastic asphalt. It provides very hard and durable repairs in minimal time (traffic release within 15-30 minutes) and can be heated either in a bitumen cooker or with a hand burner.

- FOR HARD, SOLID, AND PERMANENT REPAIRS
- PATENTED GRANULATE MATERIAL FOR EASY HEATING AND APPLICATION
- HEATED BY HAND BURNER OR BITUMEN COOKER

Instructions for use: prepare the surface by cleaning debris. For deeper repair areas than two cm, it is advisable to apply the product in layers. Application by bitumen **boiler**: pour out the heated material and level. Sprinkle on gravel for friction and gently compact the material. Application with a **hand burner**: heat the edges to soften the adjacent old asphalt (optional). Pour out the material and heat it with the hand burner. Sprinkle on gravel for friction and gently compress the it into the asphalt.
