

ASPHALT SEALANT

Potmix® Asphalt Sealant is a quickly drying cationic polymer bitumen compound for sealing old and worn asphalt areas. It is easy to apply with a regular paint roller. It will prevent water ingress to prolong the lifespan of the asphalt and give it a fresh appearance. The product shelf life is 18 months and it must be stored above 0°C.

- **PERMANENT ASPHALT SEALER**
- **COLD APPLIED AND QUICK CURING**
- **CONTAINS NO SOLVENTS**

User instructions: **clean the surface** with a brush from dust, oil and grease. The cleaner the surface, the better the end result. The **surface must be dry** and the temperature at least 5°C. **Mix the product thoroughly before use.** Pour the liquid over the surface and **spread it thinly** with a roller. The utensils can be easily cleaned with water after use. The drying time is between 10-60 minutes depending on the ambient temperature and how thinly it is applied. On high-traffic surfaces, the product can be applied in layers for more durability - drying is required between subsequent layers. The consumption is about 2-4 m²/l depending on the coarseness of the surface and the temperature of the product.
